

Velpex Gas Multilayered Piping System is designed to make every job faster and easier.

It has a much simpler and quicker installation method providing a revolutionary alternative for gas distribution for all commercial projects throughout Australia.

The Complete Pipe System

Velpex multilayered pipe holds a 25 year manufacturers guarantee and complies with relevant Australian Standards. Laboratory ageing tests have calculated it to last more than 50 years assuring that the installed system is there to stay.

Ideal substitute for copper

Excellent resistance to pressure

Strength

Velpex gas multilayer pipe is made of a longitudinal welded aluminum layer, surrounded on the inside and outside with layers of X-linked polyethylene.

The aluminium gives the pipe strength, providing excellent resistance to pressure, heat and oxygen which eliminates diffusion making it an ideal substitute for copper.

Compatibility & Versatility

With our extensive range of crimp fittings, crimping tools and quick clips, installation is much faster than copper!

VELPEX FIRE COLLAR

This is the only multilayered composite Pipe fire collar on the market. (Tested and meets as1530.4 -2005)

The revolutionary, unique Velpex Collar has released Velpex to the commercial market by meeting the Fire rating requirements for both floor and wall penetrations up to 63mm Velpex Pipe. Velpex Collar is the only approved composite pipe fire collar on the market and is the only fire collar that provides a true smoke seal.

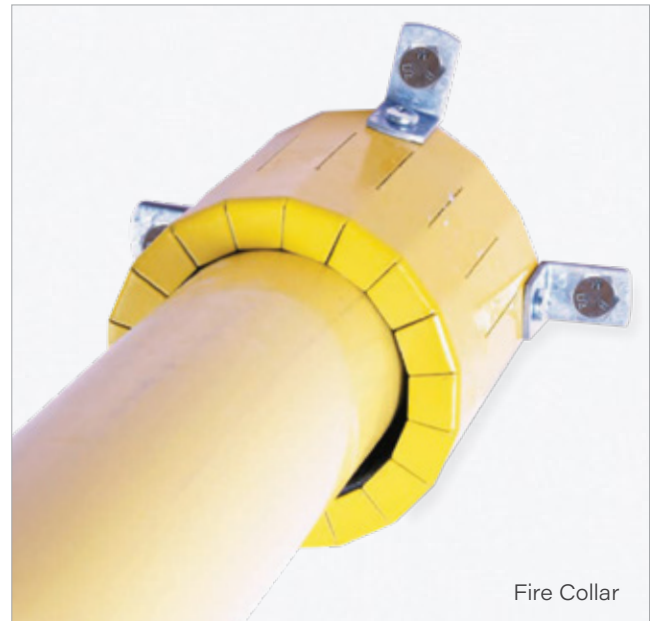

Our Special Retro Fit Velpex Collars are simple to install, but powerful in action. With a specially engineered mechanical high tension spring and high performance intumescent material you can now safely fire rate Velpex pipe penetrations in accordance with AS1530.4-2005 achieving 4 hour FRL in floor penetrations and 3 FRL in wall penetrations. Made and proven in Australia you can be assured that Velpex Collars are produced to the highest standards of workmanship.

Efficiency & OH&S

There are no sparks, swarf, flux or glue required for Velpex multilayered pipe. With our light weight, clean, flexible pipe and clipping system, installation times and OH&S issues, suddenly become almost insignificant.

Shape Retention

The aluminum between the protective inner and outer layers holds the gas pipe in position and will not allow it to kink under pressure.
